

# BABY WILDLIFE PHOTOGRAPHY WORKSHOP

### About the Workshop

If you know me at all you know about my passion for wildlife and my fondness for photographing at the Triple D Ranch. I've been photographing here for years and have photographed every species in the menagerie in every season and location. I know how to photograph at the Triple D and after this workshop you'll be stunned by the quality and quantity of images that you'll have.

### At a Glance

Location: ..... Kalispell, MT  
Arrive by:..... 6 PM June 26, 2012  
Depart:..... July 1, 2012  
Cost:..... \$1395  
Contact..... jeffwendorff@gmail.com

Nothing will prepare you for the cuteness overload that will occur during this very very special time at the Triple D when the babies are born! Holy Cats Batman, photographing a weeks old bobcat or Mountain Lion is just amazing! This is the stuff of legend that you would not be able to photograph in the wild without years and untold thousands of dollars.

## Included in the Workshop

The fee includes 3 days of photography instruction with classroom session critiquing your images and “how to” help on photographing wildlife. We will also allocate a few hours to help you with your digital workflow. OH! There will be a fabulous pizza party during our orientation.

We'll be photographing 8 species during our 3 days. During this workshop we can expect to photograph multiple species in a variety of different but ecologically true situations. While the specific species cannot be confirmed until our arrival we almost always see mountain lion, bobcat, coyote, fox, raccoon, and wolf.

Transportation to the workshop and during the workshop are not included. Your local accommodations and meals are also not included.

## Itinerary

### Day 1 (June 26, 2012)

6:00PM ~ Holiday Inn Express

Arrive in time for an informal get together at the hotel. We'll have some time to meet each other and we'll go over what you can expect for the next few days including just how early you'll be getting up each day!

### Days 2-4 (June 27-29, 2012)

These will be our primary workshop days. Plan to rise and shine early in the morning so we can be in position for the morning festivities. We'll return to base in the middle of the day. You'll have time to forage for lunch, download your images, recharge your batteries and then meet for that days classroom activities. This is the format we'll follow all 3 days.

### Day 5 (June 30, 2012)

This day is a wild card. It will be used to make up any sessions that had to be canceled for some unplanned occurrence as well as for you to add a couple of more sessions. These extra sessions are \$150 per person per species and some species will have a minimum number of participants for them to be available.

The workshop is officially over on the 29th assuming the make up sessions are not required. I will of course be there to assist with your optional sessions if you decide to add some more sessions. I'd be quite surprised if you didn't book at least one!

### Day 6 (July 1, 2012)

Departure day.

We are generally...GENERALLY, done by noon on the 30th. So it may be possible for you to catch an afternoon flight on the 30th.
